

# AEROCRUZE 100 AUTOPILOT

Next-generation autopilot upgrade  
for Cessna and Piper aircraft

**Honeywell**

# UPGRADE YOUR AIRCRAFT WITH HONEYWELL'S LATEST AUTOPILOT TECHNOLOGY

The AeroCruze 100 is an affordable and flexible digital autopilot system for Cessna 172, 175, 177, 180, 182, 185, Piper PA 28 and PA 32 aircraft. More models coming soon.

Complete system is offered at a low cost, with the choice of three form-factor variations:

- 2" round
- 3" round
- Flat pack

## POWERFUL AND FLEXIBLE

Connects to either hand-held GPS or IFR panel mount GPS systems. When connected to hand-held GPS, follows programmed flight plans. When connected to panel mount GPS, autopilot follows roll steering commands to fly complex flight plans.

Altitude selector built in and requires no interface to other avionics for operation. Similar to lane assist in automobiles, the AEP stand-by mode monitors aircraft bank angle.

Autopilot corrects the bank angles greater than 45 degrees by automatic roll command. Emergency autopilot level button helps to bring the aircraft to a wings-level position.
